SUMMARY

Software developer with 1+ year of experience building scalable applications using React Native, Python, FastAPI, and SQL. Proven track record in automation and cross-functional collaboration. Passionate about writing clean, efficient code and delivering measurable improvements to product quality and user experience.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, React Native, React.JS, FastAPI, SQL

Tools & Platforms: Microsoft Navision, VS Code, REST APIs, Jupyter Notebook

EXPERIENCE

IT Trainee

May 2025 – Feb 2026

Sipradi Trading Pvt. Ltd.

Kathmandu, Nepal

- Automated data integration from React.js-based web sources into Microsoft Navision using Python and FastAPI, improving operational efficiency.
- Designed and deployed a **Service Order Portal** to digitize and automate paper-based workflows, streamlining the service operations lifecycle end-to-end.
- Gained hands-on expertise in ERP operations across Navision and Business Central 2023, optimizing data synchronization workflows and cross-system data integrity.

React Native Intern – Mobile Application Developer

Jul 2024 – Feb 2025

Placement Nepal

Kathmandu, Nepal

- Developed and shipped interactive animations in React Native that increased **user engagement by 30%**, measured by session interaction metrics.
- Built a customizable in-app printing module achieving **95% accuracy** and **reducing print errors by 20%**, directly improving user satisfaction scores.
- Collaborated with cross-functional teams to integrate new product features, improving **deployment efficiency by 15%** and accelerating release cycles.

Quality Analyst / Game Tester

Mar 2020 – Jul 2021

Yarsa Lab

Kathmandu, Nepal

- Tested and validated interactive board games (Dominoes, card games) and 3D simulations (driving, parking) across multiple platforms to ensure functionality and usability.
- Executed exploratory and regression testing, identified defects, and partnered with developers to verify fixes – ensuring consistent performance across releases.
- Reviewed user feedback and product reviews to surface quality insights, helping prioritize developer effort on high-impact bug fixes.

PROJECTS

Fake News Detection | *NLP, TF-IDF, LinearSVC* | [Streamlit](#) | [GitHub](#)

- Built and deployed an end-to-end fake news classifier (Logistic Regression, Naive Bayes, LinearSVC) with 5-fold stratified cross-validation, achieving **98.57% test accuracy** and **98.51% F1-score**.
- Deployed as a Streamlit app with TF-IDF feature extraction and real-time confidence scoring using the best-performing model.

Nepali License Plate Recognition | *CNN, YOLOv8* | [GitHub](#)

- Built a license plate detection and recognition system for Nepali vehicles using YOLOv8 for plate localization and a CNN model for character recognition.

Comparative Study on Stock Market Forecasting | *LSTM, GRU, Random Forest* | [GitHub](#)

- Conducted a comparative study of LSTM, GRU, and Random Forest models for forecasting Nepal Stock Exchange (NEPSE) prices, evaluating model performance across accuracy and generalization metrics.

EDUCATION

Bachelor of Engineering in Computer Engineering <i>Khowpa Engineering College, Purbhanchal University</i> Major: Artificial Intelligence, Software Engineering, Data Mining & Warehousing	Oct 2019 – Oct 2024 <i>Bhaktapur, Nepal</i>
---	--

CERTIFICATIONS

SQL Fundamentals	<i>DataCamp</i>
Data Science and AI	<i>Vritjobs</i>
Machine Learning Fundamentals in Python	<i>DataCamp</i>
Supervised Machine Learning in Python	<i>DataCamp</i>
